

DOUBLE RUN CONVEYOR

Efficient enclosed horizontal and inclined conveying for grain, feed and other free-flowing bulk materials.

A chain-and-paddle conveying solution engineered to help move bulk materials efficiently in a compact, modular design.

DESIGNED FOR EFFICIENT GRAIN FLOW

- **Reduced grain damage**
Enclosed chain-and-paddle conveying helps move material with fewer opportunities for impact and handling stress.
- **Higher conveying capacity**
Available in configurations with capacities up to 15,000 bushels per hour.
- **Compact modular design**
Built to fit the application while helping simplify installation and future system planning.

PRODUCT INFORMATION

TUBE SIZES

6, 8, 10, 12 and 14 inch

CONVEYING ANGLE

Horizontal and inclines up to 60 degrees

DRIVE UNITS

Dodge MTA drive units with SCA adapters for simplified mounting

CONSTRUCTION

Heavy UHMW paddles with 81XHH or WH124 chain

TUBE OPTIONS

Various tube gauges available
